Professional summary

Junior Full Stack Developer with hands-on experience building MERN stack applications, including real-world projects such as full-stack e-commerce platforms. I am capable of developing responsive user interfaces, RESTful APIs, and database solutions. Currently, I am learning TypeScript, Next.js, and NestJS, and I am focused on improving my ability to write clean, maintainable code to solve real-world challenges.

Projects

Poultry E-Commerce Web App (In Progress)

A real-world e-commerce application demonstrating state management and full-stack development concepts. Implemented core functionalities including product browsing, category management, shopping cart functionality, user profile management, and image handling with Cloudinary.

Tech Stack: React.js + Vite, Axios, Google Authentication, Node.js
MongoDB, Mongoose, Cloudinary.

Authentication System

Implemented user registration, login, and Google authentication.
Passwords are encrypted using bcrypt.
Used Axios to communicate with the backend.

Tech Stack: React.js + Vite, Tailwind CSS, Node.js, MongoDB, Mongoose, Google Authentication, Axios.

ReadTrack Web App

A book tracking application where users can manage and track the books they have read. Implemented full CRUD operations for creating, viewing, updating, and deleting book records.

Tech Stack: React.js + Vite, Tailwind CSS, Node.js, MongoDB, Mongoose.

Skills	Frontend	Backend	Database and Authentication
	React.js + Vite, JavaScript,Tailwind CSS, HTML, CSS	Node.js, Express.js, REST APIs	MongoDB, Mongoose JWT Authentication, Google Authentication
	Tools : git and github		I am Learning: TypeScript,Next.js, NestJS

Education

Bachelor of Science in Information Systems
Addis Ababa University
